Introduction

I am a senior undergraduate student in the Department of Computer Science and Engineering at Seoul National University. I have a strong interest in programming languages, static analysis, and functional programming. I enjoy collaborating as part of a team and presenting ideas clearly to others. Additionally, I am eager to engage in international projects, as I find it fascinating to experience diverse perspectives and environments.

Education

Seoul National University, South Korea *Mar 2020 – Current*
BS in Computer Science and Engineering

- GPA: 4.06/4.3
- **Coursework:** Data Structures, Algorithms, Computer Architecture, System Programming, Operating Systems, Programming Language, Database, Artificial Intelligence
- Expected Graduation: February 2026

University of California, Los Angeles (UCLA), USA *Sept 2022 – Apr 2023*
Exchange Student

Hana Academy Seoul *Mar 2017 – Feb 2020*
High School Diploma

Experience

Research Intern *Seoul, South Korea*
ROPAS (Programming Research Laboratory) *July 2024 – Current*

Skills & Languages

Programming Skills

- C, Java, Python, OCaml, C++, C#, Scala, Rust

Languages

- Korean (Native)
- English (Fluent) — TOEFL 115/120 (2022 January)

Projects

Gravitable Escape (3D Game) github.com/swpp-project

- Developed a 3D puzzle platformer game using Unity as a project of Principles and Practice of Software Development course.
- Tools Used: Unity, C#, Blender

Awards and Scholarships

Jung-hun Foundation Scholarship, Full-tuition scholarship

2022 - 2024

University Scholarship

Fall 2021, Fall 2024
